Title: Hazardous Waste Treatment, Storage, and Disposal Facilities and Hazardous Waste Generators; Organic Air Emission Standards for Tanks, Surface Impoundments, and Containers; Final Rule
Affected: 40 CFR Parts 262, 264, and 265
Action: Final rule; clarification and technical amendment.
Comment: The EPA promulgated standards (59 FR 62896, December 6, 1994) to reduce organic air emissions from certain hazardous waste management activities. Since publication of the final standards on December 6, 1994, the EPA has given public notice and taken comment on several proposed revisions to the final rule, and has made corresponding amendments. In response to public comments and inquiries, today's action makes clarifying amendments to certain regulatory text and reinstates certain regulatory provisions that were previously contained in the rules and later inadvertently removed.

EPA has concluded that the petitioned waste is not a hazardous waste when disposed of in a Subtitle D landfill. This exclusion applies only to the wastewater treatment plant (WWTP) sludge generated by American Steel Cord in Scottsburg, Indiana.

Title: Hazardous Waste Management System; Identification and Listing of
 Hazardous Waste; Final Exclusion
Affected: 40 CFR 261
Action: Final rule.
Comment: The Environmental Protection Agency (EPA) is granting a petition
 submitted by Occidental Chemical Inc. (Occidental), to exclude from
 hazardous waste control (or delist) certain solid wastes. The wastes being
 delisted consist of Rockbox Residue, and Limestone Sludge. The EPA has
 concluded that the petitioned wastes are not hazardous wastes when
 disposed of in Subtitle D landfills/surface impoundments. This final rule
 excludes the petitioned wastes from the requirements of hazardous waste
 regulations under the Resource Conservation and Recovery Act (RCRA)
 when disposed of in Subtitle D landfills/surface impoundments but imposes
 testing conditions to ensure that the future-generated wastes remain
 qualified for delisting.
